Andreichuk Yuliia

Dear Mrs. Yuliia!

We are a Ukrainian Charity Foundation “Kids to Kids” established in 2017 in Kyiv, Ukraine. Our mission is to help children with special needs throughout Ukraine, including both orphanages and low income families with disabled children.

Our name “Kids to Kids” reflects the main idea of all our projects. Our sponsors not only provide financial support to the low income families with disabled kids but also get directly involved in joint communication projects. Each event organized by the foundation is, first of all, a family holiday, which inspires in children sensitivity to others, the ability to sincerely and selflessly give a helping hand.

February 24, 2022 divided the life of every Ukrainian into "before" and "after". The foundation is working in a new mode, adapting to martial law.

We stay in touch 24/7 with all the wards of the foundation to support psychologically and financially. As before, we involve children with their parents in raising funds to support families with children with disabilities. Collected funds are spent on diapers, medicines, baby food and rehabilitation courses in the rehabilitation centers.

The Foundation provides monthly assistance to 30 families living in different cities and villages of Ukraine and raising children with disabilities. Assistance from the Foundation includes special food, necessary medicines and hygiene products. The Foundation provides wheelchairs, specialized bathing beds, rehabilitation equipment.

One of the most important and costly aspects of our assistance to children with disabilities is guaranteeing their participation in rehabilitation courses at specialised institutions. Each course is individual, as it depends on the physical and psychological condition of the child, as well as the financial ability of the parents. All of our charges live in different cities and villages throughout the Ukraine, so they take rehabilitation courses in different rehabilitation centers according to their turn and the availability of places. Families pay for travel, board and lodging on their own. The fund only covers medical services. Children diagnosed with cerebral palsy are in dire need of ongoing, lifelong rehabilitation. And that is why one of the main tasks of our fund is to use all possible opportunities for the constant rehabilitation of each ward not only in specialized centers, but also at home.

The Foundation also supports 4 orphanages in Ukraine where children with developmental disorders live and are brought up:

- Novoborivsky orphanage in Zhytomyr region,
- Udaytsy Specialized School in Chernihiv region,
- Berdychiv Specialized School in Zhytomyr region,

- Toretsk Center for Social Rehabilitation of Children in Donetsk Oblast, which was temporarily relocated to the orphanage in Pushcha Voditsa, Kyiv region.

The total number of children in the orphanages under our care is about 400 people aged 3 to 18 years old.

Now, like all Ukrainians, we are expanding the circle of people we help. Whenever possible, we also provide one-time support to families affected by the hostilities and single mothers in difficulty.

We are writing to you to seek your help in charitable support with any of the following items:

diapers for children sizes 5, 6, 7;

adult diapers sizes M, L;

disposable diapers;

dry and wet wipes;

children's clothing and footwear aged 3 to 16 years;

bed linen and towels.

Any donation from your side could be of the greatest value.
